6 Courses

Math and Python for Data Analysis

Training on labeled data

Finding structure in data

Building conclusions on data

Applied tasks data analysis

Data analysis: final project

Aug 30, 2021

Dmitry Govorukhin

has successfully completed the online, non-credit Specialization

Machine learning and data analysis

The specialization covers the core topics that a data scientist needs: modern methods of classification and regression, finding structure in data, conducting experiments, drawing inferences, the basic fundamental mathematics that make them work, as well as the basics of Python programming. Students master modern analytical tools and learn how to adapt them to the specifics of specific applied problems.

Evgeny Ryabenko,
Emily Dral,
Victor Kantor,
Evgeny Sokolov

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute an enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the student.
